Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

In the middle of page 2, the filing date for the application 09/443,360 (in claiming the benefit under Title 35) is incorrect. The correct filing date should be 11/19/1999 instead of 11/15/1999.

A new oath or declaration is required because the foregoing reason. The wording of an oath or declaration cannot be amended. If the wording is not correct or if all of the required affirmations have not been made or if it has not been properly subscribed to, a new oath or declaration is required. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

Specification

2. The disclosure is objected to because of the following informalities:

On page 1, at line 2, "November 15" should be replaced as -- November 19 --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2823

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Liu et al. (US 6,088,263)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

In re claim 1, Liu et al. , in Figs. 6-7 and corresponding text, teach a method comprising:

- defining a pair of spaced apart floating gates 28a and 28b over a substrate;
- forming a stacked control gate 36a/36b over each floating gate 28a and 28b; and
- forming a drain 86 and a pair of sources 84 by implantation using said stacked control gates 36a/36b as a mask.

In re claim 2, Liu et al. also teach using said control gates 36a/36b to protect said floating gates 28a/28b from said control gates implantation (Fig.7) since while performing the implantation I₂, said control gates 36a/36b are covered up top surfaces of said floating gates 28a/28b.

In re claim 3, Liu et al. teach self-aligning said sources 84 and drain 80 to both of said control gates 36a/36b, as shown in Fig.7.

Art Unit: 2823

In re claim 4, Liu et al. teach using substrate hot electron injection 66 (i.e. substrate hot carrier injection, Fig.2 and col. 3, lines 50-55) to charge said floating gates 28a and 28b.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Liu et al. to US 6,624,026 (in Figs. 2-7) read on the claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hsien-ming Lee whose telephone number is 571-272-1863. The examiner can normally be reached on Tuesday-Thursday (8:00 ~ 6:00).
